Sensibilisations	Les filles dans le monde et en particulier dans les pays en développement et notamment le Tchad continuent d'être discriminées injustement en raison de leur sexe ou pire encore elles sont privées d'éducation parce qu'elles naissent filles ou deviennent mères précocement. Cette raison me pousse d'organiser un événement de sensibilisation. L'objectif c'est de sensibiliser les parents sur l'éducation et l'autonomisation des filles mères, pour ces dernières aient une place importante dans la société. Car nous ne pouvons pas les condamner par ce qu'elles deviennent mères si tôt. Elles ont droit à l'éducation, santé comme tout autres. YOUTH REDEFINING AGRICULTURE	Agribusiness is one of the most viable forms of self employment in my country, Kenya. However, the youth have been raised with the mentality of studying so as to secure white collar jobs. This has made a very large population of youth associating Agriculture with poverty. I am a successful example of what an educated youth can achieve through Agriprenurship. I have a company, Groliva Farm Limited that does Hydroponics Tomato Production quite profitably under the sponsorship of KCB Foundation. Community Peace Dialogue	Volunteering in community local dispute and Peace dialogue. This is seeing how community dwellers can take ownership and sustain our fifteen years of unbroken peace. It can be recalled that most of us(the locals) are unable to settled issues that don't necessarily need to get police or government and including courts. There issues that even we, the community people can simply resolve without reaching to community leaders. For instance, community chairman, town chief and etc. So, after creating such awareness, through community meetings and dialogues citizens will settle local disputes. It will helps reduce security major works around us. Gender Base Violence	Gender-based violence is a phenomenon deeply rooted in gender inequality, and continues to be one of the most notable human rights violations within all societies. Gender-based violence is violence directed against a person because of their gender. Both women and men experience gender-based violence but the majority of victims are women and girls. Gender-based violence and violence against women are terms that are often used interchangeably as it has been widely acknowledged that most gender-based violence is inflicted on women and girls, by men. Eliminating Child Labor	After the civil war in Liberia, it has been difficult for her to put an end to child labor practices. According to the ILO 2006 report Liberia is one of the country that has worst form of child practices. The knowledge about child labor is relatively weak. The gross roots of commitment to reduce child labor are poor in Liberia. Child Labor instances are rampant across the country and they primarily exist in the mining, agricultural, homes and informal sectors in Liberia. For such reasons, child labor is view in Liberia as something only taking place outside the child home. CONTRACT BUSINESS FOR WOMEN	Traditionally, African women are believed to be majorly for the kitchen and the other room. However, with the downward trend of global economy with recessionary consequences, many women have put on the garb of amazon breadwinners in their families. Daughters and mothers now publicly argue for the family upkeep financially paying bills and rents along with their brothers and fathers. Is it not then very appropriate to empower such women in the arts and science of high profit making ventures like contract businesses? Empowering women with tech!	With gender roles in Africa actively shifting and more and more financial responsibilities; women are faced with limited options on increasing their earning potential. As a group, we are currently providing free training for women and kids who are interested in core technology careers especially coding. During a study, we realised women in my community didn't understand the opportunities available in coding in particular or tech generally. I would like to use this opportunity to demystify technology as much as i can and offer interested women an opportunity to be problem solvers and earn more. PROJECTWASH	The UCDiaries embarks upon community outreaches and projects yearly, one of which is the Project PSALMS. In lieu of the United Nations project of provision of water, sanitation and hygiene (WASH) for rural communities; UCDiaries intends to make hygiene practices feasible, possible and accessible. However, for hygiene practices to be a safe reality, a clean water source must be existent. Hence, the innovation of providing Ibianang Ediene community, a rural community in Ikono LGA with clean water source, a necessity which they lack. Leveraging on technology, specifically solar energy, the UCDiaries will construct a solar powered water borehole system. July 18 #HeroWeek	In every day we wake up to heroism. The greater challenge is in choosing how and to whom we act out our heroism towards. One can choose be a hero to themselves by giving themselves an excellent breakfast to start their morning, or they could take it an extra mile by preparing a lunch pack to give to a homeless person on their way to work/school/anywhere. We could be heroes to ourselves by keeping warm, or take it an extra mile by giving away a jacket to the homeless. Students leaders workshop	As we all know, leadership grows with us and at times its the training that an individual goes through to become a good leader, and given the platforms given to students by schools to be leaders there, its vital and important to equip them with the necessary skills of leadership while in school to help them not to make the worst mistakes ranging from personal failure as a student but also failing the institution, if we train the young then patriotism will easily be achieved and avoid bad leaders in the future.
